

RETRACTABLE SERIES

GVS2100R

OPTIONS

- Single-Stage Gas Flush
- Longer Seal Lengths (up to 61")
- 4 Nozzles
- Cleanroom Ready
- 3/8" Wide Seal Bar
- Water Cooling
- 220 Volt
- Plus Many More

ACCESSORIES

- Stainless Steel Stand and Shelf #AC8001/2
- Stainless Steel Feeder Tray #AC8003
- Stainless Steel Cleaner #AC3000
- Spare Parts Kit #AC-SPKGV2100R

Features and specifications subject to change without notice.

Twin Retractable High-Vacuum Flow Rate Nozzles

- Increased productivity:
Twin stainless steel nozzles make it possible to do two bags in a single cycle.

Virtually eliminates the need for an operator to manipulate the bag during the vacuum cycle.

Ease of loading, especially large bags and bulky products.
- Improved performance:
Stainless steel more durable and easier to clean than plastic nozzles.

Upper and Lower Heating Elements

- Increased productivity:
Upper and lower heating elements allow for faster sealing.
- Improved performance:
Better seal integrity, particularly on hard-to-seal materials such as Tyvek and heavy foils.

PIC Touch Screen Control

- Touch Screen control:
Allows for accurate control of vacuum, gas purge, seal time & dwell settings.
- Programable:
You can program and store up to 63 recipes.

Venturi Vacuum Pump

- Improved performance:
No moving or electrical parts make the venturi pump very quiet during the vacuum cycle.
- Increased performance:
Impulse seal system allows both heating and cooling of material to take place under pressure for optimum results.

Handles products that give off abrasive residue or have a high moisture content.

Pneumatic Safety-System

- Improved safety:
Prevents accidental operator injury by use of a back-pressure sensitive micro switch to prevent jaws from locking down in the event an unwanted object (i.e. hand or finger) is present in the seal area.

Model Number	GVS2100
Max. Seal Length	21"
Std. Seal Width	.25"
Electrical	115 VAC
Vacuum Pressure	25" Hg
Air Consumption	7.8 cfm

High-Grade Stainless Steel Body, Heavy Duty Anodized Aluminum Frame

- Increased productivity:
Ideal for food, medical and cleanroom applications.
- Improved performance:
Stainless steel and anodized aluminum are easy and quick to clean.

RETRACTABLE SERIES

vacuum and vacuum/gas sealer

The Retractable Series is the workhorse of Gramatech's tabletop vacuum sealing line products. Made from high-grade stainless steel and heavy-duty anodized aluminum, these units will provide years of superior service. Ideal for medium to high volume use, units in the Retractable Series can be easily customized to meet special requirements in such diverse applications as food, medical or clean room environments. Standard features include: upper and lower heat bars; Touch PLC screen control; single-ported exhaust; and Gramatech's exclusive built-in safety seal bar. The Retractable Series is an unequalled product for both its quality and price.
