

PLI-VALV®

PACKAGE DEGASSING SYSTEM

PVA-50™ Semi-Automatic Valve Applicator

The PVA-50™ Semi-Automatic Valve Applicator is the most efficient way to apply our one-way degassing valves to pre-made packages. The PVA-50™ is a compact, self-contained, easy to operate unit equipped with an integrated valve oiling system and foot operated valve placement trigger. The patented applicator head technology enables accurate vent-hole punch and placement of PLI-VALV® one-way degassing valves.

Protected under US Pat. #7,178,555

Applications

- ▶ Valve application to pre-made packages

Features

- ▶ Adjustable for different size packages
- ▶ Foot operated trigger for valve placement
- ▶ Integrate valve oiling system
- ▶ Durable stainless steel housing

Benefits

- ▶ Consistent valve oiling, hole punch and valve placement
- ▶ Safe and easy to use
- ▶ No installation necessary

Specifications

Dimensions (LxWxH)	27" x 13" x 30"
Application rate	User dependent
Placement accuracy	+/-0.031"
Power	120/240V 50/60Hz
Compressed air	2.5CFM
